

Boarding Information

GVC
GERMAN
VETERINARY
CLINIC

We would like to inform you of the following procedures, which help us to ensure the health and wellbeing of all our guests:

1. All cats should be fully vaccinated against

- Feline Herpesvirus
- Calicivirus
- Feline Parvovirus

These are covered by the “Tricat” or “Felovax” vaccinations commonly used in this country.

These vaccines should be valid for the duration of your cat’s stay with us, if they are not, we will be happy to vaccinate your cat on arrival or during the course of his / her stay.

2. We also recommend that your cats are vaccinated against Rabies.
3. Your cat will be given a full health check by a Nurse on arrival to ensure that he / she does not have any transferable conditions such as ringworm, ear mites or external parasites. To ensure good flea and tick control in the cattery, your cat will receive a dose of “Frontline” on arrival, which may be repeated if your cat is staying with us for more than 6 weeks.
4. Your cat will be weighed on arrival at the GVC and then every week during his / her stay with us. Included in the boarding stay is either *Royal Canin Kitten* food for kittens, *Royal Canin Indoor* for adult cats and *Royal Canin Indoor Mature* for older cats. **If your pet requires any other food, we ask you to supply this at your own cost.**
5. We would like to encourage you to bring some of your cat’s favourite toys, bedding, pillows and anything else which you think they may like to have with them during their stay with us!
6. If you would like any veterinary / medical procedures to be carried out whilst your cat is with us, we are more than happy to accommodate this. Please let us know if you require neutering, vaccinations, dental procedures, nail trims, grooming etc.
7. All medium- and long-haired cats will be brushed daily. All cats will have their eyes cleaned and receive a general check up daily.

8. Please let us know in advance if your cat is on long term medication or has special needs so that we can cater for this.
