

HOW IT WORKS

PREPARATION FOR IMPORT

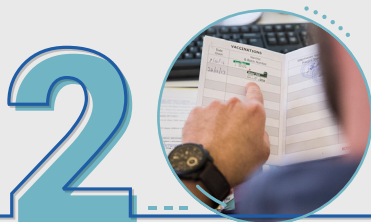

Our caring team of experts manage every step of your pet's import and journey to their new UAE home in collaboration with our overseas partners; rest assured that they are in safe hands.

1 Contact our experienced team by phone, email or in person, so we can generate a personalised quote for you

4 Your pet will require Internal and External Parasite Treatment within 14 days prior to travel

2 UAE allows 2 pets per passport holder and we will check if your pet has the relevant vaccinations & paperwork according to UAE country regulations

If you are travelling from a rabies high-risk country

- ▶ Pets must be minimum 27 weeks old
- ▶ A Rabies Serology Test is required minimum 12 weeks before pets can travel

If you are travelling from a rabies low-risk country

- ▶ Pets must be minimum 15 weeks old
- ▶ A Rabies Serology Test is NOT required

5 Your pet will require a Health Check within 24 hours of travel and the UAE Health Certificate must be signed and stamped by the Official Veterinarian of the departure country

6 We take great care that your pet is well looked after in liaison with our overseas partners, and that they are priority boarded onto their flight to the UAE

3 GVC will generate an Import Permit for your pets

7 On arrival, we will clear your pets through customs and gladly deliver them to your door (anywhere across the UAE)
